ERP for
Packaging Industry

◆ About Us

Tech Cloud ERP Software Pvt. Ltd., is an india based software development company offering a spectrum of information technology, consulting and business enhancement services.

◆ Introduction

Running a packaging business means handling many things like designs, raw materials production, quality checks and delivery. Using spreadsheets or separate tools can lead to delays, confusion and waste of time.

Tech Cloud ERP gives you a complete Packaging Management Software that brings everything into one place. Whether you make boxes, bottles, pouches or cartons, this system helps you manage work faster, better and with less stress.

◆ Benefits of Using Tech Cloud ERP

- Finishing the orders fast with clear planning and tracking
- Avoid wastage by using materials wisely and reducing downtime
- Handle custom designs easily and keep track of all versions
- Check product quality at every step
- Connect all departments so everyone works on the same data
- Make smarter decisions with clear reports and cost tracking

◆ Key Features Made for Packaging Industry

➤ Bill of Materials with Version History

Track every change in size, material, or layer. Easily manage revisions and maintain full transparency across your production process.

➤ Machine & Shift Planning

Plan jobs efficiently by balancing machine usage and team availability. Use real-time capacity insights to schedule work without overloading resources.

➤ Quality Checks at Every Stage

Ensure every product meets your standards. Identify and fix issues early with quality checks throughout the workflow.

➤ Artwork Approvals & Specification Management

Easily manage artwork files, get customer approvals and update specifications perfect for handling custom orders.

➤ Multi-Level Pricing & Contract Management

Offer flexible pricing and manage customer contracts directly within the ERP system.

➤ Barcode & RFID Tracking

Simplify warehouse operations with barcode or RFID support for accurate and fast inventory tracking.

➤ Role-Based Access Control

Keep your data secure. Each team only sees what they need, making the system simple and safe for everyone.

Main Modules in the ERP

1. Production Planning

Plan your production based on machine availability and worker shifts. Instantly see what's in progress, what's delayed and where you can speed things up to stay on track.

2. Inventory & Purchases

Stay on top of your stock in real time. Know exactly when raw materials or finished goods are running low and easily manage inventory across all your warehouses.

3. Artwork & Specifications

Keep all your design files, product details and approvals in one secure place. Control who can make changes and track every update with a clear history.

4. Sales & Orders

Handle customer quotes, order confirmations and deliveries from a single system. Set custom pricing and manage contracts based on each customer's needs.

5. Quality Checks

Check product quality at every stage from raw materials to the final product. Record issues quickly and track whether items pass or fail your standards.

6. Accounts & Billing

Manage all your billing and accounting tasks in one place. Create invoices, track payments, handle GST and access detailed financial reports.

7. Reports & Dashboards

Make better decisions with real-time reports and visual dashboards. Get instant insights into your production, sales, inventory and costs.
